

# Container Based Weapon System (CBWS)

## Weapon agnostic protection tool powerful and flexible enough to counter most threats.

EOS has teamed with Spirit of America to provide a Container Based Weapon System (CBWS) which can be operated remotely via wire or wirelessly utilizing FM radios. This solution is lightweight, mobile, inconspicuous and can be networked to provide security and situational awareness for any size installation.

The R400S-Mk2-D-HD continues the commitment to refine and improve EOS' remote weapon system product range. The R400S-Mk2-D-HD remains a single system specifically developed to provide 30 mm firepower in a high precision weapon system weighing less than 880 lbs (400 kg). It retains its R400S heritage to operate a variety of other weapons including machine gun and automatic grenade launcher.

The Spirit of America's Mission Configurable Container System (MCCS) is light, maneuverable and adaptable. It can operate from shore power (110 VAC), optional rechargeable batteries or mobile electric power.

The lifting mechanism/platform can accommodate **5,000** pounds of payload. The retractable roof panel affords enough clearance to allow the deployment of the XM914/M230LF 30mm 30x113 cannon. Operations can be conducted both with and without the trailer. The stiffness of the container, paired with the R400S Mk2's stabilization affords unequalled accuracy and precision for any weapon combination.

SPECIFICATIONS	DUAL CONFIGURATION M230LF/7.62 MM GPMG	M230LF	12.7 MM HMG	7.62 MM GPMG	M134D	40 MM AGL
